BACKGROUND

The Statewide Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (Once-Through Cooling Policy or OTC Policy) requires that the Statewide Advisory Committee on Cooling Water Intake Structures (SACCWIS) be convened to ensure that implementation of the OTC Policy will not cause disruption in the State of California's electrical power supply. The SACCWIS prepares an annual report for the State Water Resources Control Board (State Water Board) to summarize the state's current electrical grid reliability needs and to recommend modifications, if necessary, to the compliance schedule for fossil fuel power plants using ocean water for once-through cooling.

A member of the SACCWIS or designee will present the findings of the 2019 SACCWIS Report as an informational item to the State Water Board during the ~~April 16~~ **May 21**, 2019 Board Meeting.
